SCANNING OPERATION FOR REGENCY 250

For the unit to scan, the mike hook must be grounded. After the mike has been grounded, press the scan button and the unit will start scanning.

1) Priority Scan Operation:

    a) Press   Manual Key
    b) Press   Channel Number
    c) Press   Prior Key - the priority light will come on.
    d) Press   Pro. Prior. Key
    e) Press   Enter Key
    f) Press   Scan Key

2) To delete a channel from scanning:

    a) Press   Manual Key
    b) Press   Channel Number to be deleted
    c) Press   Delete Key

3) To enter a channel back into the scanning mode:

    a) Press   Manual Key
    b) Press   Channel Number to be entered
    c) Press   Enter Key

4) To take the unit out of the Priority mode:

    Press   Prior Key - the priority light will go out.

    To re-instate Priority mode:

    Press   Prior Key - the same priority channel will be activated.
